

TECHNIQUES FOR GRAPHICS PROFILING

ABSTRACT

5 Methods, systems, and apparatus profile the processing of a graphics
application. Performance data of a processing graphics application is monitored and
dynamically presented on a display of a viewer at defined intervals. The
performance data includes hardware and driver performance data for the processing
graphics application at the defined intervals. The viewer can inspect the
10 performance data for purposes of customizing the graphics application for a targeted
hardware and software platform.
